# Hi, I'm Juan Carlos Muñoz!

But most people call me Chino 🤔

## Most exp with:

- HTML
- CSS
- JavaScript, TypeScript
- React
- C#, ASP.NET Core
- Microsoft Power Platform
- Azure Data Factory

## Some exp with:

- Tailwind CSS
- Angular
- Vue
- MongoDB
- Node.js
- Express.js

## Others:

- Azure services
- Figma
- Webflow
- SEO
- PWAs
- Ping Pong 🏓

## Certifications:

- Microsoft Certified - Azure Fundamentals

## Education

### University of Santo Tomas

2019

Bachelor of Science in Computer Science

## Professional Experience

### Accenture Inc - Avanade

2020-Present

Application Development Senior Analyst

- Developed web applications using mainly React and ASP.NET Web API with C#. Although I worked as a full-stack developer, I spent most of my time in these projects working on the front-end. Most of these web applications utilized Microsoft Azure services such as: Azure SQL DB, Azure Cosmos DB, Azure Functions, Azure Logic Apps, Azure Storage, and etc. Also provided guidance and mentored my juniors, especially when it comes to styling with CSS.
- Involved in multiple projects utilizing Microsoft Power Platform, a set of low-code tools. Developed applications from scratch using Power Apps, created workflows and processes using Power Automate, and built dynamic dashboards and data reports using Power BI. Also has experience creating chat bots using Power Virtual Agents and Microsoft Bot Framework.
- Worked as a Data Engineer on a project for a Microsoft video gaming brand. Created daily automated pipelines in Azure Data Factory to obtain raw data from Azure SQL Server, Azure Cosmos DB, and Azure Data Explorer. These pipelines also cleaned and transformed the collected raw data using scripts written in C# to create multiple sets of facts, which were used for reporting and marketing purposes. I also worked on redesigning all their Power Apps to create a universal theme, taking inspiration from the Microsoft Fluent UI framework.

## Other Experiences

When time allows, my partner (designer) and I (web developer) work freelance. Currently, we use Webflow for projects which gives us the right amount of customization while speeding up development time. Unfortunately, I won't be able to showcase these projects just yet. Hopefully soon, but for now:

### Vasquez BPO - [vasquezbpo.com](https://vasquezbpo.com)

2020

Freelance Web Developer

- First freelance job. Designed by my partner and built by me with just HTML, CSS, and vanilla JavaScript. Sadly, creating a mobile view for the website was not deemed a priority for this project.

### Personal Site - [onecarlosmunoz.com](https://onecarlosmunoz.com)

2023

Web Developer

- My online resume turned personal playground. Made with React and Tailwind.
